

Why Test Fire Hydrants?

Here's why...

REASON 1

**VERIFY
FLOW &
PRESSURE
RATE**

REASON 2

**CLEAR
GRIME
BUILD-UP**

REASON 3

**REPLACE
RUSTY
VALVES**

REASON 4

**REPAIR
DAMAGE
FROM
TAMPERING**

With limited water supply on their trucks, firefighters depend on hydrants to extinguish larger fires. If the hydrant does not operate properly, your business could suffer devastating consequences.
